

## Town of Ladysmith Parks Recreation and Culture Master Plan

The Parks Recreation and Culture Master Plan was developed for the Town of Ladysmith to provide guidance over the next ten years and beyond for parks, trails, recreation and cultural facilities and amenities as well as programs and services.

GDH Solutions led a comprehensive review of the Town's recreation, culture and park facilities, amenities, and programs and services. The development of the Plan was supported by extensive community consultation including focus groups, interviews, a community opinion survey and Open Houses.

The Plan also considered the community's demographics, current trends in parks, recreation and culture, and the wide variety of amenities and opportunities available in Ladysmith. Recommendations covered capital improvements, parkland acquisition and development, programs and services, partnerships, marketing and communications, and administration. The Implementation Plan provided priorities, costing and timing.

Project Value \$45,000
