

Parks & Open Space Discussion Paper – Regional Growth Strategy

Regional District of Central Okanagan

The Parks & Open Space discussion paper provides a forum for policy analysis and recommendations to the RDCO Board that are geographically relevant and within the context of a basin wide approach. The discussion paper was developed through consultation with local and provincial agencies, professional experts and other groups (committees, NGO's etc.). It focussed on developing a clear analysis of parks and open spaces, needs, priorities and resources, capacity and roles and responsibilities in the region. The Parks Discussion paper was incorporated into the overall Regional Growth Strategy document which will guide the Regional District of North Okanagan for the next 20 years.
